- Q. 5) The Philosophical views and ideology of John Dewey is known as 'Pragmatism'. Dewey is well known for his important works as the promoter of Pragmatism and the developer of functional Psychology. John Dewey supported learning by doing based on the individual experiences obtained by interaction with his environment. He was opposed to the concept of dualism and believed that the thoughts and ideas of human mind and psyche do not recognise due to any external spiritual world. Rather, it is a product of evolution we can clearly evident 'experimentalism', 'Pragmatism' etc. directly Dewey's Philosophy.
- 1) To Prepare the prime work of education. Reflects to the society. To Prepare child for the life.
- 2) School should provide real-world experiences to the children.

- ④ In Schools, students should be provided opportunities for learning by self doing, experiencing, experimentation and testing. They learn quickly from these all methods.
- ⑤ As a social institution function of the school is to incorporate values in the child to play a significant role of the progress of society.
- ⑥ According to (Dewey), at the school should provide education to the learners only after knowing, understanding, on analyzing their experiences and assessing their needs.
- ⑦ School should rewards and motivate skilled children by organize creative activities and competition on social objective.
- ⑧ School ~~also~~ should prepare curriculum to make student understand the external world (social and physical) by doing so, children will be alert toward society and will be able to make and life progressive.

and growth of Innate Power. for this they are aware of the benifites of goods. health and arrangement for yoga, exercise and sports are made for them, so that they get more and more opportunities to nurture their senses -

The Aim of mental development :-

A very important objective of education is that it provides the knowledge of language for the exchange of the ideas learned, and the knowledge of the different subjects. so that they can make sense of the material world and the spiritual world around them. their mental Power such as memory, inspection, reasoning, imagination, contemplation, Judgement, equalization etc. get enhanced.

The Aim of Social Reperment :-

It is very clear that a person can neither live nor progress without social context. The security & interest of the person depends on the society being. Education makes children aware of the society being.
